AAMC Physician Competency Reference Set (PCRS) & Social Accountability (SA) FIU HWCOM Competency

PATIENT CARE: Provide patient-centered care that is compassionate, appropriate, and effective for		
the treatment of health problems and the promotion of health		
PC 1	Perform all medical, diagnostic, and surgical procedures considered essential for the area of	
	practice	
PC 2	Gather essential and accurate information about patients and their condition through	
	history-taking, physical examination, and the use of laboratory data, imaging, and other tests	
PC 3	Organize and prioritize responsibilities to provide care that is safe, effective, and efficient	
PC 4	Interpret laboratory data, imaging studies, and other tests required for the area of practice	
PC 5	Make informed decisions about diagnostic and therapeutic interventions based on patient	
	information and preferences, up-to-date scientific evidence, and clinical judgment	
PC 6	Develop and carry out patient management plans	
PC 7	Counsel and educate patients and their families to empower them to participate in their care	
	and enable shared decision making	
PC8	Provide appropriate referral of patients including ensuring continuity of care throughout	
	transitions between providers or settings and following up on patient progress and	
	outcomes	
PC 9	Provide health care services to patients, families, and communities aimed at preventing	
	health problems or maintaining health	
PC 10	Provide appropriate role modeling	
PC 11	Perform supervisory responsibilities commensurate with one's roles, abilities, and	
	qualifications	
	epidemiological, and social-behavioral sciences, as well as the application of this knowledge ent care	
to patie	ent care Demonstrate an investigatory and analytic approach to clinical situations	
to patie	Demonstrate an investigatory and analytic approach to clinical situations Apply established and emerging biophysical scientific principles fundamental to health care	
KP 1 KP 2	Demonstrate an investigatory and analytic approach to clinical situations Apply established and emerging biophysical scientific principles fundamental to health care for patients and populations	
to patie	Demonstrate an investigatory and analytic approach to clinical situations Apply established and emerging biophysical scientific principles fundamental to health care for patients and populations Apply established and emerging principles of clinical sciences to diagnostic and therapeutic	
KP 1 KP 2 KP 3	Demonstrate an investigatory and analytic approach to clinical situations Apply established and emerging biophysical scientific principles fundamental to health care for patients and populations Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision making, clinical problem solving, and other aspects of evidence-based health care	
KP 1 KP 2	Demonstrate an investigatory and analytic approach to clinical situations Apply established and emerging biophysical scientific principles fundamental to health care for patients and populations Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision making, clinical problem solving, and other aspects of evidence-based health care Apply principles of epidemiological sciences to the identification of health problems, risk	
KP 1 KP 2 KP 3	Demonstrate an investigatory and analytic approach to clinical situations Apply established and emerging biophysical scientific principles fundamental to health care for patients and populations Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision making, clinical problem solving, and other aspects of evidence-based health care Apply principles of epidemiological sciences to the identification of health problems, risk factors, treatment strategies, resources, and disease prevention/health promotion efforts for	
KP 1 KP 2 KP 3 KP 4	Demonstrate an investigatory and analytic approach to clinical situations Apply established and emerging biophysical scientific principles fundamental to health care for patients and populations Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision making, clinical problem solving, and other aspects of evidence-based health care Apply principles of epidemiological sciences to the identification of health problems, risk factors, treatment strategies, resources, and disease prevention/health promotion efforts for patients and populations	
KP 1 KP 2 KP 3	Demonstrate an investigatory and analytic approach to clinical situations Apply established and emerging biophysical scientific principles fundamental to health care for patients and populations Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision making, clinical problem solving, and other aspects of evidence-based health care Apply principles of epidemiological sciences to the identification of health problems, risk factors, treatment strategies, resources, and disease prevention/health promotion efforts for patients and populations Apply principles of social-behavioral sciences to provision of patient care, including	
KP 1 KP 2 KP 3 KP 4	Demonstrate an investigatory and analytic approach to clinical situations Apply established and emerging biophysical scientific principles fundamental to health care for patients and populations Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision making, clinical problem solving, and other aspects of evidence-based health care Apply principles of epidemiological sciences to the identification of health problems, risk factors, treatment strategies, resources, and disease prevention/health promotion efforts for patients and populations Apply principles of social-behavioral sciences to provision of patient care, including assessment of the impact of psychosocial-cultural influences on health, disease, care-seeking,	
KP 1 KP 2 KP 3 KP 4	Demonstrate an investigatory and analytic approach to clinical situations Apply established and emerging biophysical scientific principles fundamental to health care for patients and populations Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision making, clinical problem solving, and other aspects of evidence-based health care Apply principles of epidemiological sciences to the identification of health problems, risk factors, treatment strategies, resources, and disease prevention/health promotion efforts for patients and populations Apply principles of social-behavioral sciences to provision of patient care, including assessment of the impact of psychosocial-cultural influences on health, disease, care-seeking, care-compliance, and barriers to and attitudes toward care	
KP 1 KP 2 KP 3 KP 4 KP 5	Demonstrate an investigatory and analytic approach to clinical situations Apply established and emerging biophysical scientific principles fundamental to health care for patients and populations Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision making, clinical problem solving, and other aspects of evidence-based health care Apply principles of epidemiological sciences to the identification of health problems, risk factors, treatment strategies, resources, and disease prevention/health promotion efforts for patients and populations Apply principles of social-behavioral sciences to provision of patient care, including assessment of the impact of psychosocial-cultural influences on health, disease, care-seeking, care-compliance, and barriers to and attitudes toward care Contribute to the creation, dissemination, application, and translation of new health care	
KP 1 KP 2 KP 3 KP 4 KP 5	Demonstrate an investigatory and analytic approach to clinical situations Apply established and emerging biophysical scientific principles fundamental to health care for patients and populations Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision making, clinical problem solving, and other aspects of evidence-based health care Apply principles of epidemiological sciences to the identification of health problems, risk factors, treatment strategies, resources, and disease prevention/health promotion efforts for patients and populations Apply principles of social-behavioral sciences to provision of patient care, including assessment of the impact of psychosocial-cultural influences on health, disease, care-seeking, care-compliance, and barriers to and attitudes toward care	
KP 1 KP 2 KP 3 KP 4 KP 5	Demonstrate an investigatory and analytic approach to clinical situations Apply established and emerging biophysical scientific principles fundamental to health care for patients and populations Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision making, clinical problem solving, and other aspects of evidence-based health care Apply principles of epidemiological sciences to the identification of health problems, risk factors, treatment strategies, resources, and disease prevention/health promotion efforts for patients and populations Apply principles of social-behavioral sciences to provision of patient care, including assessment of the impact of psychosocial-cultural influences on health, disease, care-seeking, care-compliance, and barriers to and attitudes toward care Contribute to the creation, dissemination, application, and translation of new health care	
KP 1 KP 2 KP 3 KP 4 KP 5 KP 6	Demonstrate an investigatory and analytic approach to clinical situations Apply established and emerging biophysical scientific principles fundamental to health care for patients and populations Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision making, clinical problem solving, and other aspects of evidence-based health care Apply principles of epidemiological sciences to the identification of health problems, risk factors, treatment strategies, resources, and disease prevention/health promotion efforts for patients and populations Apply principles of social-behavioral sciences to provision of patient care, including assessment of the impact of psychosocial-cultural influences on health, disease, care-seeking, care-compliance, and barriers to and attitudes toward care Contribute to the creation, dissemination, application, and translation of new health care knowledge and practices	
KP 1 KP 2 KP 3 KP 4 KP 5 KP 6	Demonstrate an investigatory and analytic approach to clinical situations Apply established and emerging biophysical scientific principles fundamental to health care for patients and populations Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision making, clinical problem solving, and other aspects of evidence-based health care Apply principles of epidemiological sciences to the identification of health problems, risk factors, treatment strategies, resources, and disease prevention/health promotion efforts for patients and populations Apply principles of social-behavioral sciences to provision of patient care, including assessment of the impact of psychosocial-cultural influences on health, disease, care-seeking, care-compliance, and barriers to and attitudes toward care Contribute to the creation, dissemination, application, and translation of new health care knowledge and practices	
KP 1 KP 2 KP 3 KP 4 KP 5 KP 6	Demonstrate an investigatory and analytic approach to clinical situations Apply established and emerging biophysical scientific principles fundamental to health care for patients and populations Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision making, clinical problem solving, and other aspects of evidence-based health care Apply principles of epidemiological sciences to the identification of health problems, risk factors, treatment strategies, resources, and disease prevention/health promotion efforts for patients and populations Apply principles of social-behavioral sciences to provision of patient care, including assessment of the impact of psychosocial-cultural influences on health, disease, care-seeking, care-compliance, and barriers to and attitudes toward care Contribute to the creation, dissemination, application, and translation of new health care knowledge and practices CE-BASED LEARNING AND IMPROVEMENT: Demonstrate the ability to investigate and evaluate are of patients, to appraise and assimilate scientific evidence, and to continuously improve	
KP 1 KP 2 KP 3 KP 4 KP 5 KP 6 PRACTI	Demonstrate an investigatory and analytic approach to clinical situations Apply established and emerging biophysical scientific principles fundamental to health care for patients and populations Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision making, clinical problem solving, and other aspects of evidence-based health care Apply principles of epidemiological sciences to the identification of health problems, risk factors, treatment strategies, resources, and disease prevention/health promotion efforts for patients and populations Apply principles of social-behavioral sciences to provision of patient care, including assessment of the impact of psychosocial-cultural influences on health, disease, care-seeking, care-compliance, and barriers to and attitudes toward care Contribute to the creation, dissemination, application, and translation of new health care knowledge and practices CE-BASED LEARNING AND IMPROVEMENT: Demonstrate the ability to investigate and evaluate are of patients, to appraise and assimilate scientific evidence, and to continuously improve care based on constant self-evaluation and lifelong learning Identify strengths, deficiencies, and limits in one's knowledge and expertise	
KP 1 KP 2 KP 3 KP 4 KP 5 KP 6 PRACTI their ca patient PBLI 1 PBLI 2	Demonstrate an investigatory and analytic approach to clinical situations Apply established and emerging biophysical scientific principles fundamental to health care for patients and populations Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision making, clinical problem solving, and other aspects of evidence-based health care Apply principles of epidemiological sciences to the identification of health problems, risk factors, treatment strategies, resources, and disease prevention/health promotion efforts for patients and populations Apply principles of social-behavioral sciences to provision of patient care, including assessment of the impact of psychosocial-cultural influences on health, disease, care-seeking, care-compliance, and barriers to and attitudes toward care Contribute to the creation, dissemination, application, and translation of new health care knowledge and practices CE-BASED LEARNING AND IMPROVEMENT: Demonstrate the ability to investigate and evaluate are of patients, to appraise and assimilate scientific evidence, and to continuously improve care based on constant self-evaluation and lifelong learning Identify strengths, deficiencies, and limits in one's knowledge and expertise Set learning and improvement goals	
KP 1 KP 2 KP 3 KP 4 KP 5 KP 6 PRACTI their capatient PBLI 1	Demonstrate an investigatory and analytic approach to clinical situations Apply established and emerging biophysical scientific principles fundamental to health care for patients and populations Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision making, clinical problem solving, and other aspects of evidence-based health care Apply principles of epidemiological sciences to the identification of health problems, risk factors, treatment strategies, resources, and disease prevention/health promotion efforts for patients and populations Apply principles of social-behavioral sciences to provision of patient care, including assessment of the impact of psychosocial-cultural influences on health, disease, care-seeking, care-compliance, and barriers to and attitudes toward care Contribute to the creation, dissemination, application, and translation of new health care knowledge and practices CE-BASED LEARNING AND IMPROVEMENT: Demonstrate the ability to investigate and evaluate are of patients, to appraise and assimilate scientific evidence, and to continuously improve care based on constant self-evaluation and lifelong learning Identify strengths, deficiencies, and limits in one's knowledge and expertise	
KP 1 KP 2 KP 3 KP 4 KP 5 KP 6 PRACTI their ca patient PBLI 1 PBLI 2	Demonstrate an investigatory and analytic approach to clinical situations Apply established and emerging biophysical scientific principles fundamental to health care for patients and populations Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision making, clinical problem solving, and other aspects of evidence-based health care Apply principles of epidemiological sciences to the identification of health problems, risk factors, treatment strategies, resources, and disease prevention/health promotion efforts for patients and populations Apply principles of social-behavioral sciences to provision of patient care, including assessment of the impact of psychosocial-cultural influences on health, disease, care-seeking, care-compliance, and barriers to and attitudes toward care Contribute to the creation, dissemination, application, and translation of new health care knowledge and practices CE-BASED LEARNING AND IMPROVEMENT: Demonstrate the ability to investigate and evaluate are of patients, to appraise and assimilate scientific evidence, and to continuously improve care based on constant self-evaluation and lifelong learning Identify strengths, deficiencies, and limits in one's knowledge and expertise Set learning and improvement goals Identify and perform learning activities that address one's gaps in knowledge, skills, or attitudes	
KP 1 KP 2 KP 3 KP 4 KP 5 KP 6 PRACTITUTE THEIR CAPATION TO BE 1 1 PBLI 1 PBLI 2 PBLI 3	Demonstrate an investigatory and analytic approach to clinical situations Apply established and emerging biophysical scientific principles fundamental to health care for patients and populations Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision making, clinical problem solving, and other aspects of evidence-based health care Apply principles of epidemiological sciences to the identification of health problems, risk factors, treatment strategies, resources, and disease prevention/health promotion efforts for patients and populations Apply principles of social-behavioral sciences to provision of patient care, including assessment of the impact of psychosocial-cultural influences on health, disease, care-seeking, care-compliance, and barriers to and attitudes toward care Contribute to the creation, dissemination, application, and translation of new health care knowledge and practices CE-BASED LEARNING AND IMPROVEMENT: Demonstrate the ability to investigate and evaluate are of patients, to appraise and assimilate scientific evidence, and to continuously improve care based on constant self-evaluation and lifelong learning Identify strengths, deficiencies, and limits in one's knowledge and expertise Set learning and improvement goals Identify and perform learning activities that address one's gaps in knowledge, skills, or	

PBLI 6	Locate, appraise, and assimilate evidence from scientific studies related to patients' health
	problems
PBLI 7	Use information technology to optimize learning
PBLI 8	Participate in the education of patients, families, students, trainees, peers, and other health
	professionals
PBLI 9	Obtain and utilize information about individual patients, populations of patients, or
	communities from which patients are drawn to improve care
PBLI 10	
	technologies, products, or services that have been demonstrated to improve outcomes
	ERSONAL AND COMMUNICATION SKILLS: Demonstrate interpersonal and communication
	at result in the effective exchange of information and collaboration with patients, their
	s, and health professionals
ICS 1	Communicate effectively with patients, families, and the public, as appropriate, across a
	broad range of socioeconomic and cultural backgrounds
ICS 2	Communicate effectively with colleagues within one's profession or specialty, other health
	professionals, and health-related agencies (see also interprofessional collaboration
	competency (IPC) 7.3)
ICS 3	Work effectively with others as a member or leader of a health care team or other
	professional group (see also IPC 7.4)
ICS 4	Act in a consultative role to other health professionals
ICS 5	Maintain comprehensive, timely, and legible medical records
ICS 6	Demonstrate sensitivity, honesty, and compassion in difficult conversations (e.g. about issues
	such as death, end-of-life issues, adverse events, bad news, disclosure of errors, and other
	sensitive topics)
ICS 7	Demonstrate insight and understanding about emotions and human responses to emotions
	that allow one to develop and manage interpersonal interactions
	SSIONALISM: Demonstrate a commitment to carrying out professional responsibilities and an
adhere	nce to ethical principles
P 1	Demonstrate compassion, integrity, and respect for others
P 2	Demonstrate responsiveness to patient needs that supersedes self-interest
P 3	Demonstrate respect for patient privacy and autonomy
P 4	Demonstrate accountability to patients, society, and the profession
P 5	Demonstrate sensitivity and responsiveness to a diverse patient population, including but
	not limited to diversity in gender, age, culture, race, religion, disabilities, and sexual
	orientation
P 6	Demonstrate a commitment to ethical principles pertaining to provision or withholding of
	care, confidentiality, informed consent, and business practices, including compliance with
	relevant laws, policies, and regulations
	1S-BASED PRACTICE: Demonstrate an awareness of and responsiveness to the larger context
_	tem of health care, as well as the ability to call effectively on other resources in the system
to prov	ide optimal health care
SBP 1	Work effectively in various health care delivery settings and systems relevant to one's
SBP 1	clinical specialty
SBP 1	clinical specialty Coordinate patient care within the health care system relevant to one's clinical specialty
SBP 1	clinical specialty Coordinate patient care within the health care system relevant to one's clinical specialty Incorporate considerations of cost awareness and risk-benefit analysis in patient and/or
SBP 1	clinical specialty Coordinate patient care within the health care system relevant to one's clinical specialty
SBP 1	clinical specialty Coordinate patient care within the health care system relevant to one's clinical specialty Incorporate considerations of cost awareness and risk-benefit analysis in patient and/or
SBP 1 SBP 2 SBP 3	clinical specialty Coordinate patient care within the health care system relevant to one's clinical specialty Incorporate considerations of cost awareness and risk-benefit analysis in patient and/or population-based care
SBP 1 SBP 2 SBP 3 SBP 4	clinical specialty Coordinate patient care within the health care system relevant to one's clinical specialty Incorporate considerations of cost awareness and risk-benefit analysis in patient and/or population-based care Advocate for quality patient care and optimal patient care systems
SBP 1 SBP 2 SBP 3 SBP 4 SBP 5	clinical specialty Coordinate patient care within the health care system relevant to one's clinical specialty Incorporate considerations of cost awareness and risk-benefit analysis in patient and/or population-based care Advocate for quality patient care and optimal patient care systems Participate in identifying system errors and implementing potential systems solutions

INTERPROFESSIONAL COLLABORATION: Demonstrate the ability to engage in an interprofessional			
team in a manner that optimizes safe, effective patient and population-centered care			
IPC 1	Work with other health professionals to establish and maintain a climate of mutual respect,		
	dignity, diversity, ethical integrity, and trust		
IPC 2	Use the knowledge of one's own role and those of other professions to appropriately assess		
	and address the health care needs of the patients and populations served		
IPC 3	Communicate with other health professionals in a responsive and responsible manner that		
	supports the maintenance of health and the treatment of disease in individual patients and		
	populations		
IPC 4	Participate in different team roles to establish, develop, and continuously enhance		
	interprofessional teams to provide patient- and population-centered care that is safe, timely,		
	efficient, effective, and equitable		
	ONAL AND PROFESSIONAL DEVELOPMENT: Demonstrate the qualities required to sustain		
	g personal and professional growth		
PPD 1	,		
DDD 3	engage in appropriate help-seeking behaviors		
PPD 2	, 1 0		
PPD 3			
PPD 4	, , , , , , , , , , , , , , , , , , , ,		
PPD 5	Demonstrate trustworthiness that makes colleagues feel secure when one is responsible for the care of patients		
PPD 6	Provide leadership skills that enhance team functioning, the learning environment, and/or		
PPDO	the health care delivery system		
PPD 7			
,	team at ease		
PPD 8			
	resources in dealing with uncertainty		
SOCIAL ACCOUNTABILITY. Work collaboratively to meet the health needs of patients and society,			
demonstrate improved health outcomes, and reduce health disparities.			
SA 1	Demonstrate an understanding of the influence and potential implications of social		
	determinants of health on beliefs, behaviors, and outcomes, and incorporate this knowledge		
	into patient care.		
SA 2	Identify and utilize appropriate sources of information to analyze significant public health		
	issues, applying data to reach defensible conclusions.		
SA 3	Accurately describe the organization and basic financial models of the US health care system		
	and potential impact of this system on patients for whom the student has provided care.		
SA 4	Accept and report personal biases and errors, identify potential sources of errors, and develop		
	action plans to reduce risk of future errors.		
SA 5	Collaborate with stakeholders inside and outside the health care system to coordinate optimal		
	care and improve health.		
SA 6	Apply knowledge of health advocacy, systems, and policy to identify strategies for reducing		
	health disparities and promoting individual and population health.
